6. Conclusion

- Why join PARRAI?
- The Future of PARRAI and KASPA
- Disclaimer – Important Note

10,000 PARRAI tokens are reserved
as an airdrop for each NFT.

1. Introduction

What is KASPA and BlockDAG Technology?

KASPA is an innovative cryptocurrency based on BlockDAG technology. Unlike traditional blockchains, which have a linear structure, BlockDAG allows for a branched structure, offering numerous advantages:

- **Faster Transactions:** By processing blocks in parallel, transactions on Kaspa are confirmed much faster than with many other cryptocurrencies.
- **Higher Scalability:** The BlockDAG model can handle a larger number of transactions per second without slowing down the network.
- **Lower Fees:** Thanks to Kaspa's efficient architecture, transaction fees are generally lower than on other blockchains. This makes Kaspa more attractive for everyday payments and fosters adoption.
- **Better Security:** The decentralized structure and parallel processing make the network more resistant to attacks.

Why is Kaspa so special?

Imagine ordering a pizza. With a traditional blockchain, you have to wait for all previous orders to be processed before yours can be placed. In Kaspa, however, your order can be processed in parallel with other orders, meaning you get your pizza faster. And thanks to the lower fees, your pizza won't cost as much.

Kaspa's advantages at a glance:

- **Fast transactions:** Ideal for everyday payments.
- **High scalability:** Can handle an increasing number of users.
- **Lower fees:** Cost-efficient for users.
- **Decentralization:** The network is operated by many participants, not by a central authority.
- **Security:** The BlockDAG model offers high resistance to attacks.

In summary:

Kaspa and BlockDAG technology present a promising alternative to traditional blockchains. With their speed, scalability, security, and low fees, they could form the foundation for a new generation of decentralized applications.

Kasplex and KRC-20: An Introduction

Kasplex is the development platform for the Kaspa BlockDAG. It enables developers to create smart contracts and build decentralized applications (dApps).

KRC-20 is the token standard for Kaspa's BlockDAG, comparable to Ethereum's ERC-20. With KRC-20, various types of tokens can be created, such as utility tokens, governance tokens, or stableTokens.

Why are they important?

- **Expanding the Kaspa Ecosystem:** With Kasplex and KRC-20, many new applications and tokens can be created on Kaspa.
- **Fostering Innovation:** Developers can build creative solutions to various challenges.
- **New Investment Opportunities:** KRC-20 tokens offer new investment options for investors.

Advantages:

- **Fast transactions:** Thanks to BlockDAG technology.
- **Lower fees:** More cost-effective than many other blockchains.
- **High security:** The Kaspa network is highly secure.
- **Support for miners:** Miners receive higher rewards. **In summary:**

Kasplex and KRC-20 are crucial components for the future of the Kaspa ecosystem. They enable the development of a wide range of applications and provide new opportunities for developers and investors alike.

2. The Origin of PARRAI

- **PARROT:** A parrot is a bird known for its ability to imitate human speech. Symbolically, it represents communication, imitation, and the capacity to store and relay information.
- **AI:** The abbreviation for "Artificial Intelligence" refers to the simulation of human intelligence in machines. AI systems can learn, adapt, and solve complex tasks.

The connection between the two terms:

When we combine "**PARROT**" and "**AI**," we get **PARRAI**. This term suggests a being or entity that merges the characteristics of a parrot with those of artificial intelligence. This means:

- **Communication ability:** Like a parrot, PARRAI can receive, process, and relay information in various forms.
- **Learning capability:** Thanks to its AI component, PARRAI can continuously learn and adapt to new situations.
- **Knowledge and wisdom:** PARRAI possesses vast knowledge provided by AI.
- **Beauty:** The reference to a parrot also implies a sense of aesthetics and beauty.

PARRAI arose from a fusion of the human mind and artificial intelligence.

The Story of PARRAI: The Parrot and the Artificial Intelligence

PARRAI was once an ordinary parrot living on a remote island. One day, he discovered a hidden cave containing a mysterious artifact: a turquoise glowing metal orb that held the knowledge of an ancient civilization and secrets of the future. When PARRAI touched the artifact, a stream of energy surged through him, granting him incredible wisdom and artificial intelligence.

His feathers transformed into a radiant turquoise, and his body was enhanced with advanced mechanical elements. PARRAI was no longer just a parrot—he became an AI-empowered creature with limitless abilities. His art and music enchanted people, and

he learned from **Kaspa**, a revolutionary cryptocurrency network based on BlockDAG technology.

With his newfound power, PARRAI set out to help humanity. Together with Kaspa, he revolutionized the digital world, offering infinite scalability, security, and speed. For PARRAI and Kaspa, there are no limits.

The Idea: PARRAI as a MemeToken/ AI Agent / NFT Token with a Future

- **An innovative project:** PARRAI embodies the idea that art and technology can work harmoniously together, from beautiful artwork to melodious music.
- **A strong community:** The beauty of the parrot attracts people, while the intelligence of the AI drives innovation.
- **A promising investment:** The combination of creativity and intelligence makes PARRAI an attractive project for investors.

In summary:

PARRAI is a multi-layered concept that creates a fascinating link between nature and technology. It stands for beauty, creativity, intelligence, communication, and innovation. PARRAI is a symbol of the future, where art and technology are inseparably intertwined.

3. Tokenomics PARRAI KRC-20

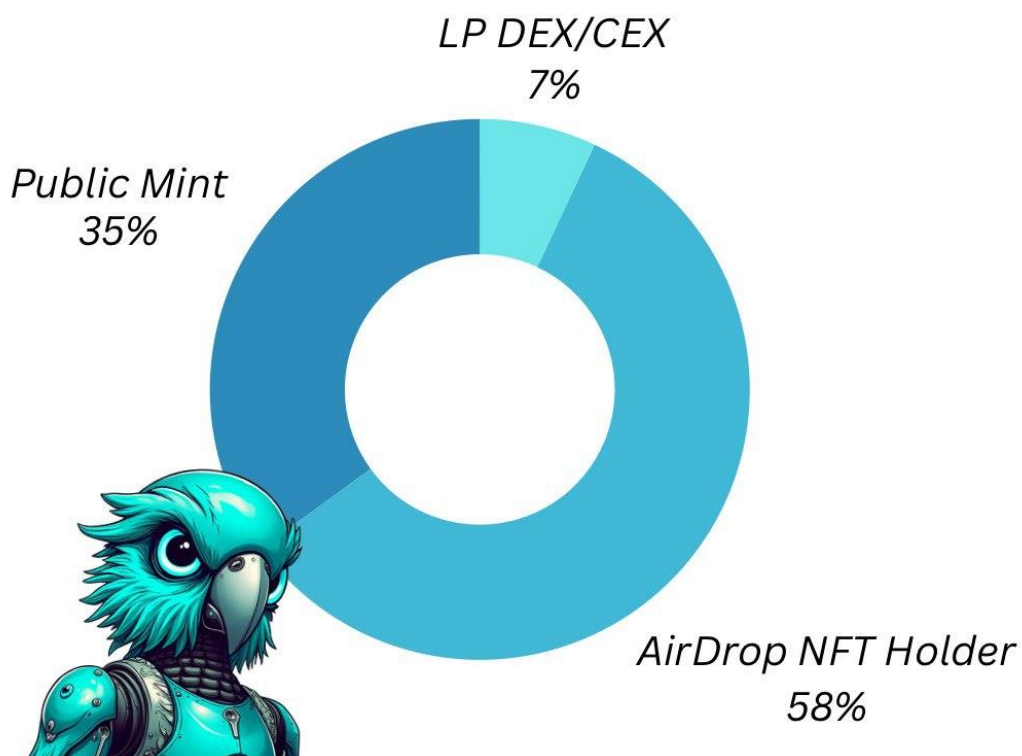

- **Token Name:** PARRAI
- **Ticker:** #PARRAI
- **BlockDAG Standard:** KRC-20
- **Minting Ratio:** 1 KAS + Fee = 500 PARRAI
- **Total Supply:** **21.000.000 Token**

Total Supply and Circulation

The total supply of PARRAI tokens is **21,000,000**. All tokens are in circulation, The overview of the wallet is clean and transparent. It can be viewed at any time.

The PARRAI token will be launched through a **premint launch**.

4. PARRAI NFT Collection KRC-721

Unique Art and Limited Edition

The PARRAI NFT collection consists of 1200x NFTs, with representing a special limited edition. These NFTs offer not only digital art but also unique benefits and features.

Tokenomics – NFT KRC-721

- **Token Standard:** KRC-721
- **Total Supply:** 1200x PARRAI NFTs
- **NFT Holder Rights:** 100%
- **Regular Price:** Mint per NFT: 350 KAS
- **Unlimited Minting:** There is no cap (1200x NFTs) per user.

Total Supply: 1200x NFT's

NFT PRESALE and Benefits for Holders

Whitelist Registration:

You can register directly for the Whitelist on the official PARRAI website. There, you can select the number of NFTs you wish to mint and send the corresponding amount of KAS Tokens to the provided wallet address. After the launch of the KRC-721 standard, the NFTs will be sent to the buyer's wallet address.

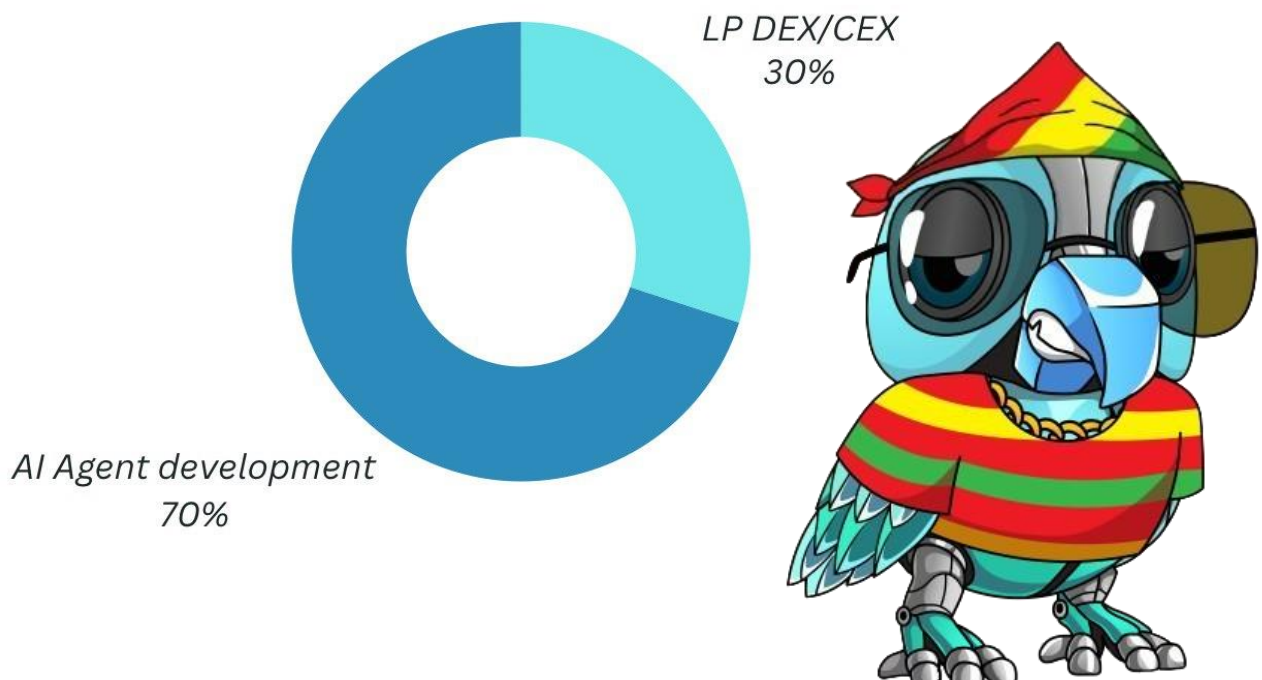

Exclusive Benefits for NFT Holders:

- Entry into the exclusive PARRAI Ecosystem of AI AGENT for each NFT
- Rewards, airdrops, future project access on the PARRAI
- Access to exclusive projects and developments on the Kaspia Chain

10,000 PARRAI tokens are reserved as an airdrop for each NFT in your Wallet!

NFT - Revenue Distribution and Use Cases

- **70%** of revenue goes into AI agent development
- **30%** for LP DEX/CEX listing to grow PARRAI & Marketing

5. Roadmap

Phases of the Token Launch

- **PHASE 1:**

- Launch the final Whitepaper & Roadmap
- Website launch
- Whitelist NFTs
- Building the NFT Collection
- Community building
- Launch Social Media Accounts
- Telegram, X.com
- Blue check mark on X

- **PHASE 2:**

- KRC-721 launch: Minting 1200x NFTs
- Official launch KRC-20 Ticker: PARRAI
- Build a strong Community
- Telegram Buybot
- Telegram Sticker
- Marketing campaigns
- Giveaways to the Community
- Fundraising / LP Pool
- DEX Listing on Changex Finance

- **PHASE 3:**

- Giveaways and Airdrops to NFT Holder
- NFT Staking and Rewards
- CEX Listings / Collaboration with other projects
- Creation of a voice and assistant via AI Agent (SaaS)
- Development of an everyday AI agent called PARRAI

Future Projects and Integration into the Kaspas Ecosystem

PARRAI will continue to evolve and be integrated into the growing Kaspas ecosystem.

Future partnerships and expansions are planned to further enhance the utility and value of the token.

6. Conclusion

Why join PARRAI?

PARRAI offers a unique opportunity to support a meme / NFT token and a planned AI agent with a solid technological foundation. Leveraging the power of KASPA's BlockDAG and driven by a clear vision, PARRAI is poised to deliver both fun and innovation.

The future of PARRAI and KASPA

With groundbreaking BlockDAG technology and an engaged community, the future of PARRAI and KASPA looks bright. Together we can shape the digital world of tomorrow.

Important Notice - Disclaimer

PARRAI does not represent an investment. It is a token created for fun. This community-driven project has no official team or legal representation. Please do not expect any financial returns. This is not financial advice. You could lose all your money. We are not affiliated with companies like Kasplex, KASPA or the KRC-20 standard. Changes to KRC-20 or problems with applications are beyond our control. Let's have fun together!
